

E-methodology

Project acronym: E-methodology

Project title: 'Methodology issues of e-learning' course by combined training

Program supporter: Apertus Public Endowment/Foundation

Contract number: AK4222/2004

Apertus grant: 8 995 000 Ft

Total budget: 11 190 000 HUF

Consortium:

- Mimóza Communications Ltd.
- Oktopus Foundation
- Euro-Contact Business School
- North Hungarian Regional Distance Education Centre

Objectives:

- To define the concept and place of e-learning in education
- To define the pedagogical and methodological components of e-learning
- Definition and structure of the learning environment of e-learning
- Planning and preparing an electronic distance teaching learning material
- To identify and correct the errors related to improper learning material editing and planning
- To identify and apply the required tutor competences

Results:

- By the end of the course the participants were able to design e-learning programs autonomously or in organized frames
- Enhancing the interest for e-learning
- The learning material could be enlarged into a whole curriculum which provided an overall e-learning training – in accredited form.

Activities:

- The development and operation of e-learning
- Ensuring the e-learning material, theoretical and practical education by combined learning methodology
- The training of max. 100 people

Target groups:

- Practising teachers of universities and colleges
- Practising teachers
- Students of teacher training colleges
- Education planners, education technologists
- Learning material developers
