

EU-matrix elements

Project Acronym:: EU-mátrix elemek

Project Title: Development and Launch of a European Union Studies distance learning material in e-learning environment

Supporting Framework: Apertus Public Foundation

Contract number: K2118/2002

Apertus support: 8 000 000 Ft

Total Budget: 9 000 000 Ft

Consortium:

- University of Miskolc, Institute of European Economics and North Hungarian Distance Education Centre
- Chamber of Commerce and Industry of Borsod-Abaúj-Zemplén County – BOKIK

Objectives:

- Establishing a distance education system based on a large co-operation between the Hungarian higher education, cultural institutions and EU information offices,
- elaboration of versatile teaching materials conducing to a cognition of the social and economic conditions of the European Union. The teaching material to be developed is supposed to inform about our integration ambitions and facilitate the preparation. All this will be realised with the application of up-to-date and effective teaching methodologies, information and communication technologies.
- elaboration of the interactive learning materiel of three 30 hours modules in the following themes:
 - European financial markets
 - The labour market of the EU
 - European crisis-handling case studies

Characteristics of the course:

- A great variety in objectives - the developed material has a great expedience. Adaptable for further- and re-training courses, in the frame of public education, gradual and post-gradual studies, PhD training in the field of various entrepreneur, cultural, educational studies.
- Modular construction – the modules function as independent courses, or as building blocks, in accordance with the objective of the training and the prescriptions of accreditation.
- High standard – university will develop the modules tutors having an average experience of 20 years in education, scientific degree, experience in distance education and international affairs.
- Practice-oriented – applying learning methods based on problem solving and case studies, raises versatile competence of the participants and skills in applying the new knowledge in the practice.

Target group:

Learning units to be developed

- target various groups, applicable as elements of different training programs, aim to increase the most important economic competence, respond to a wide range of training demands,
- will be announced countrywide, as well as abroad, through the mediation of up-to-date knowledge in flexible training forms the learning units will support our integration ambitions and will provide the trans-border Hungarian nationalities with competitive knowledge.
