

Integration

Creation of the European integration for the inland distance education institutions...

Project Acronym: Integration

Project Title: Creation of the European integration for the inland distance education institutions through joining the EADTU.

Supporting Framework: Apertus Foundation

Contract No.: K11xx/2001

Total Budget: 15 720 000 Ft

Financial support: 13 000 000 Ft

Addressed to NHRDEC: 3 500 000 Ft

Consortium:

- University of Miskolc, North Hungarian Regional Distance Education Centre
- EuroContact Business School

Objectives:

- Successful arrangement of the negotiations concerning the join of Hungary to the EADTU
- Join of two outstanding Hungarian distance education institutions to the EADTU
- Beside the two institutions the NTT and the fourth inland institution assigned by the NTT join the EADTU
- Ensure the Central European leading role of Hungary among the members of EADTU.
- Bring Hungary into the European distance education circulation for the next 3 years for the sake of the development of the information society
- Bring an EADTU conference to Hungary

Results:

- Four distance education institutions including the National Distance Education Committee representing the whole inland distance education system have been affiliated to the members of the EADTU to the end of 2001. Hereby the whole inland distance education system can be represented in suitable way in the organisation holding together the most important European distance education universities. Moreover the European represent of the inland distance education interest was realized in this way.
- As first Central European country the prestige in the inland distance education activity region increased considerably, and it was possible to form an important regional role in the organization of the EADTU.
- With the immediate relation of the EADTU members we could obtain the European distance education developments, experiments, syllabuses more easily, faster and at a cheaper rate. This strengthens directly our endeavours to the development of the information/knowledge society.
- With the help of the Hungarian website and through the NTT Hungarian coordination activity the inland distance education institutes and the Hungarian experts could gain immediate and current information concerning the European distance education strategies and tendencies.
- A possible Hungarian conference of the EADTU contributed to the inland distance education promotion, popularity, moreover it strengthened in suitable way the governmental endeavours to the development of the information society.
- A possible regional role pledge made important prestige advantage in the world of the distance education which helped indirectly the European Union endeavours of our country.
